

Blueprints :

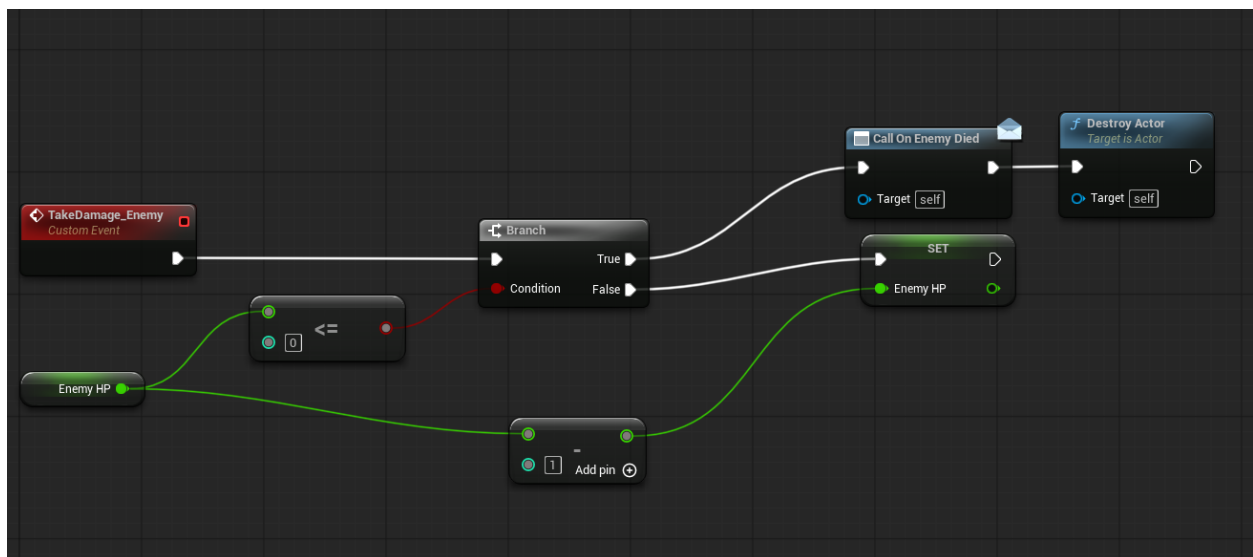

BP_ThirdPersonCharacter — Fire input event graph (ammo check → spawn projectile → decrement ammo)

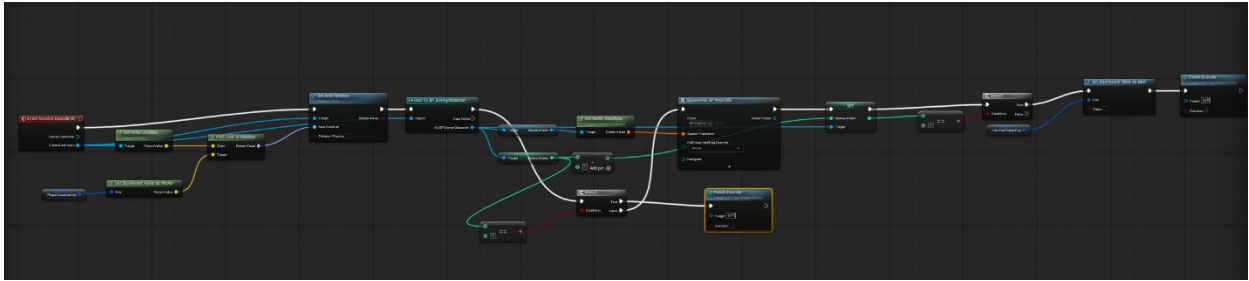

BP_ThirdPersonCharacter — TakeDamage / PlayerHP logic and death event

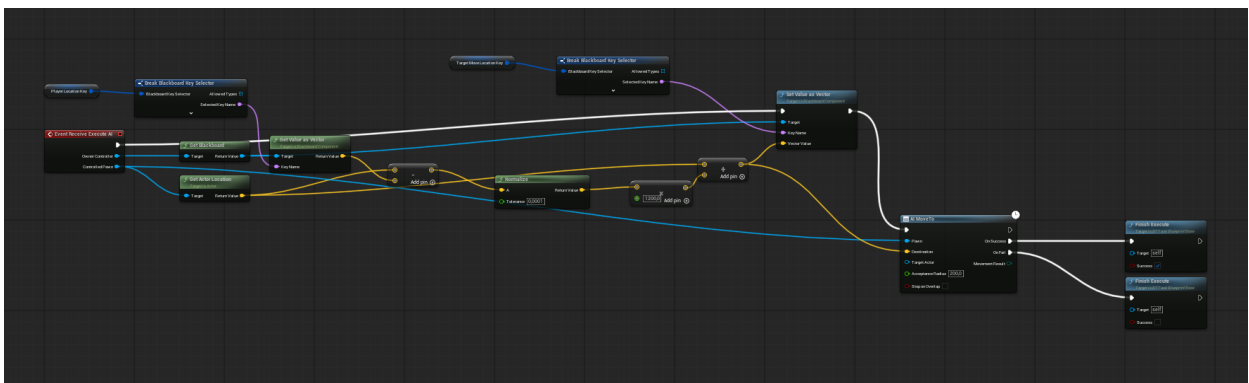

BP_Projectile — Full event graph (BeginOverlap, damage application, self-destruct)

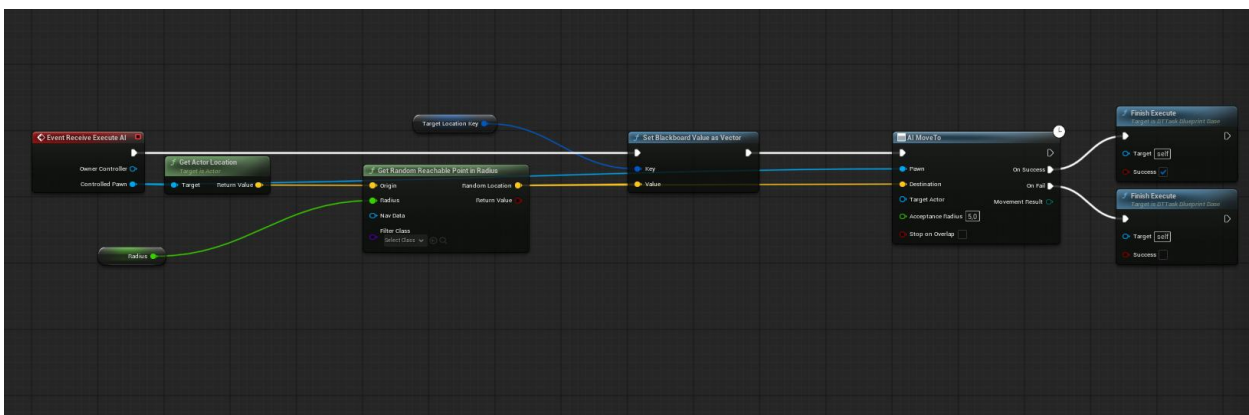

BP_EnergyCharacter — TakeDamage_Energy event and death broadcast

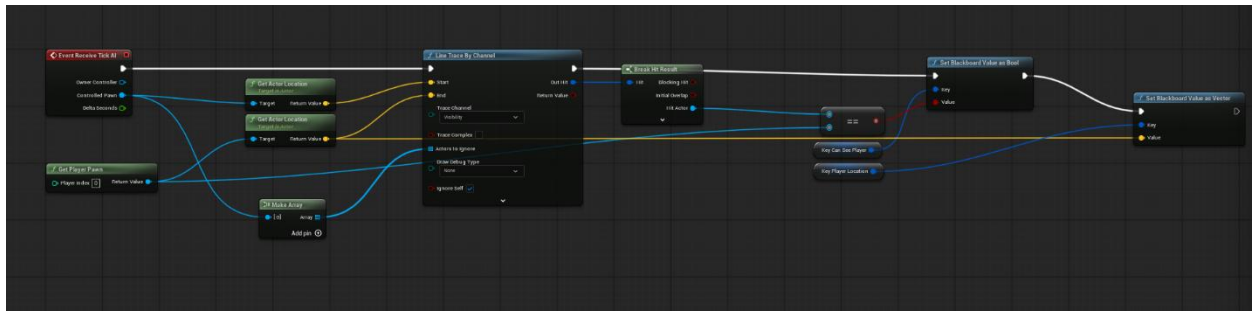

BTTask_FireProjectile — Full Blueprint graph (rotation calc, direction vector, spawn, ammo decrement)

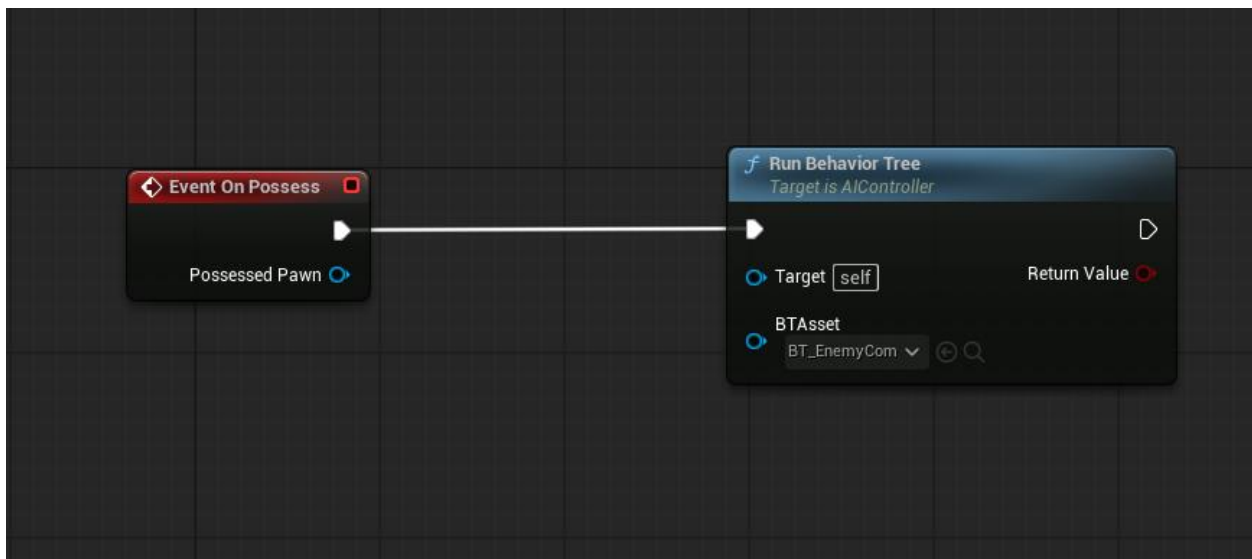

BTTask_Retreat — Movement target calculation graph

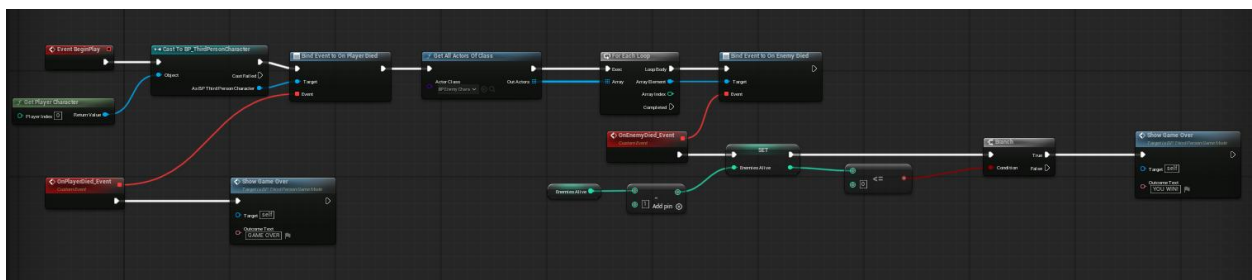

BTTask_Roam — Roam in random place when AI don't see the player

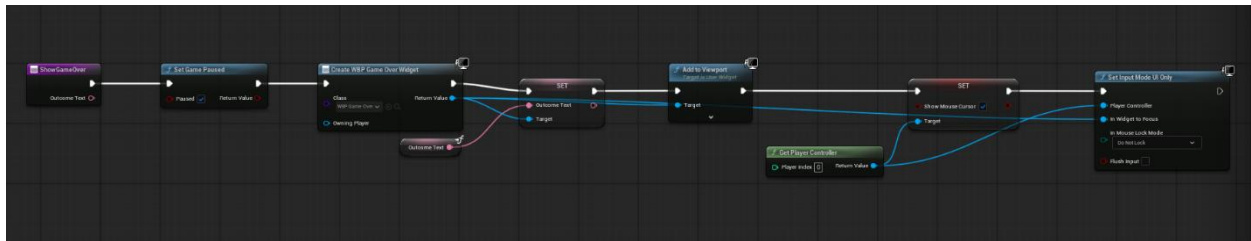

BTS_UpdateSight — Line trace and Blackboard key update graph

BP_EnergyAIController — OnPossess / RunBehaviorTree graph

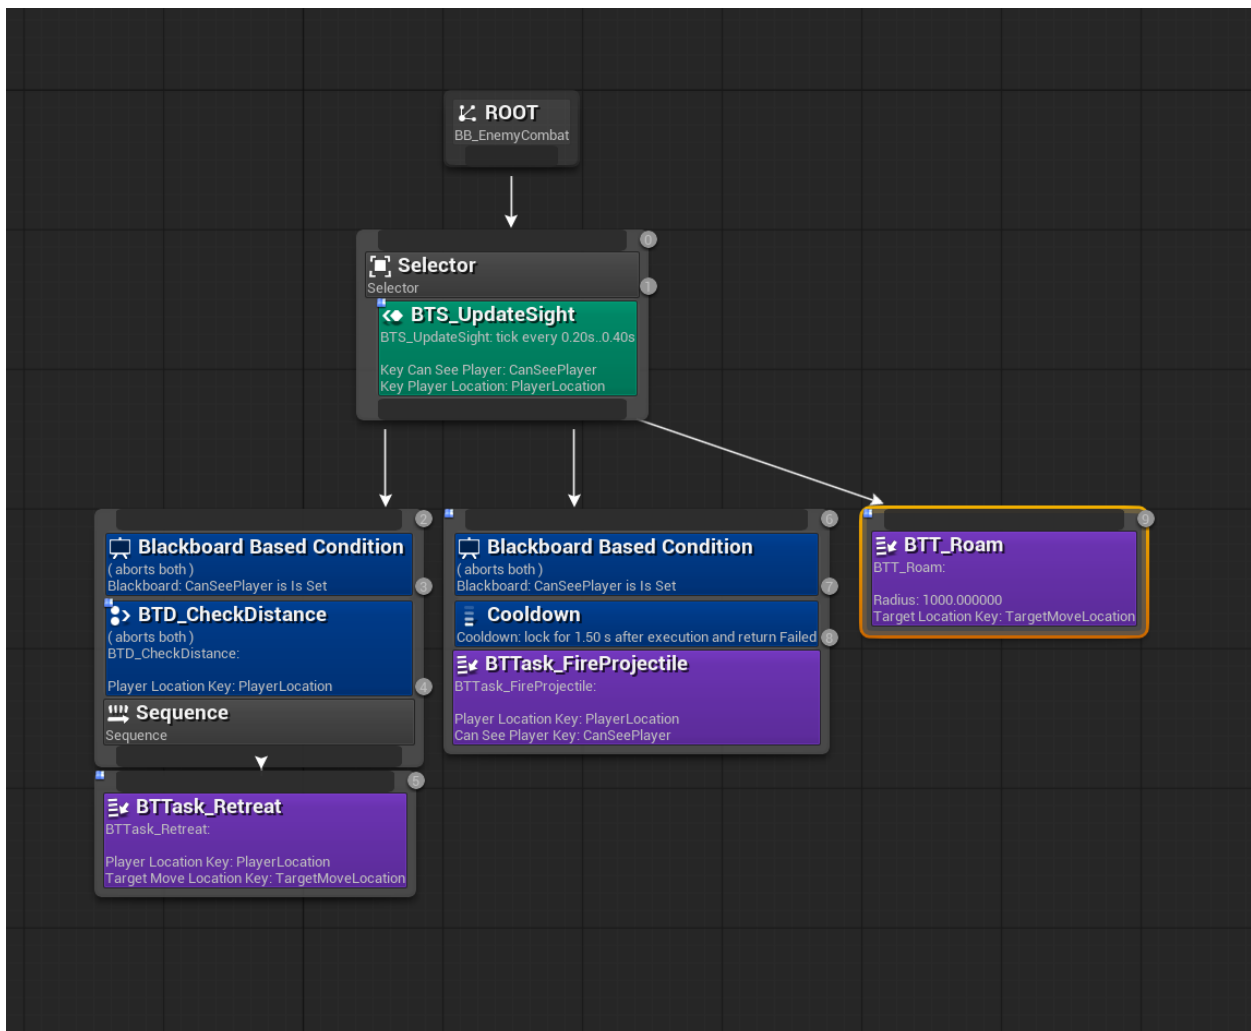

BP_GameMode — Event Graph

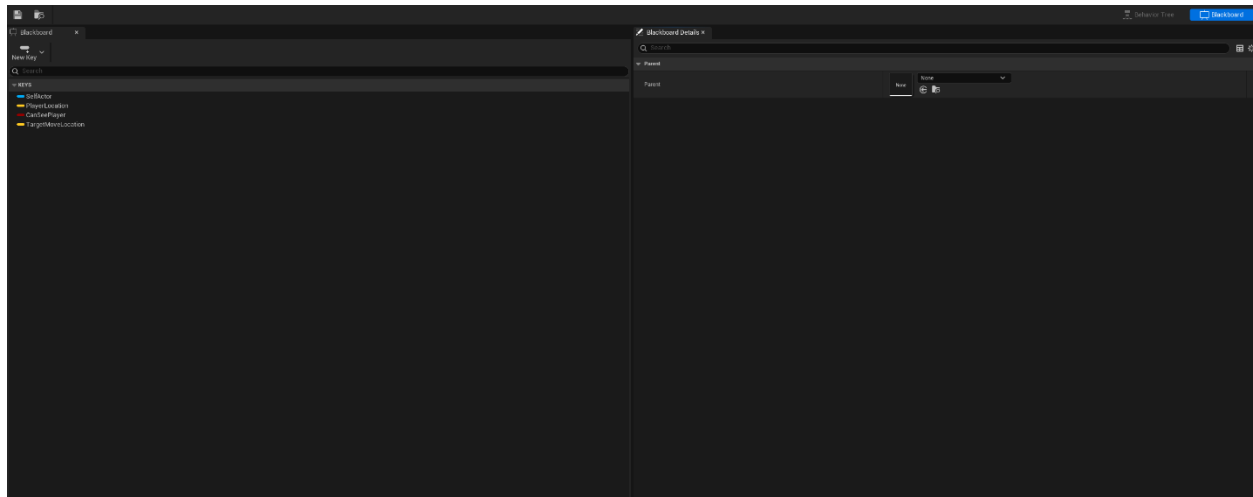

BP_GameMode — Show Game Over Function

Behavior Tree & Blackboard

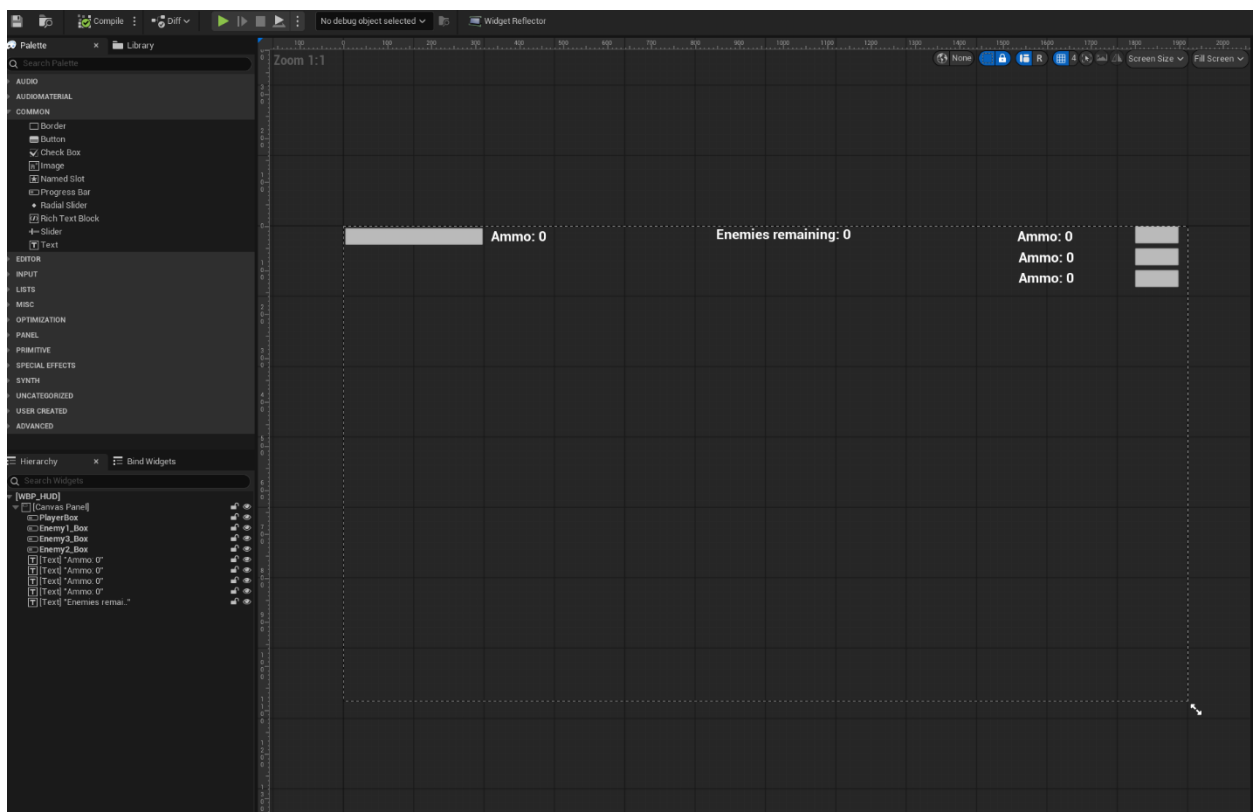

BT_EnergyCombat — Full Behavior Tree graph showing all branches (Retreat, Fire, Room) with decorators visible

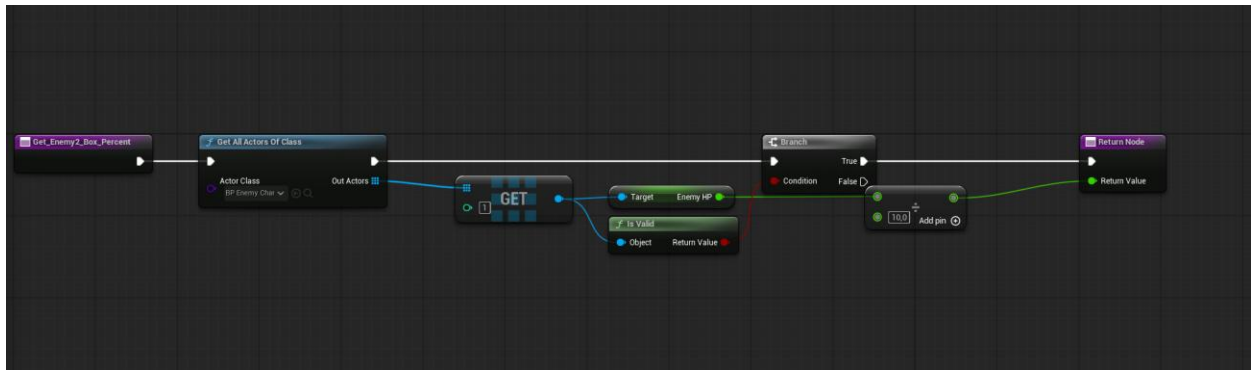

BB_EnergyCombat — Blackboard asset showing all keys (PlayerLocation, CanSeePlayer, TargetMoveLocation)

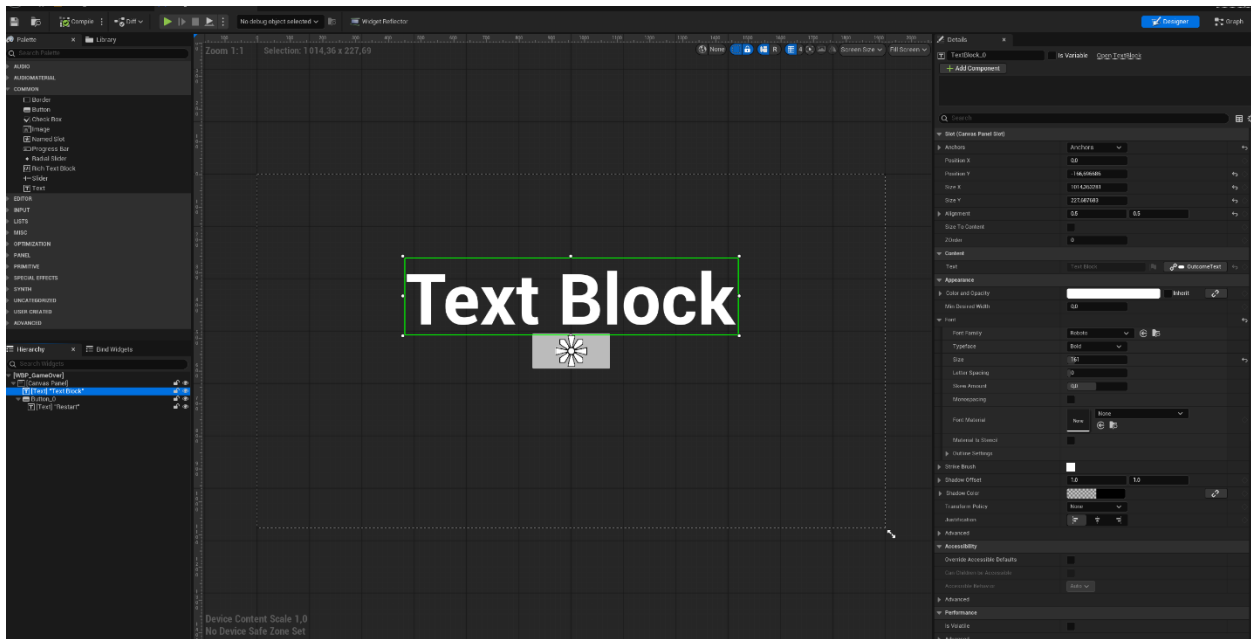

UI Widgets

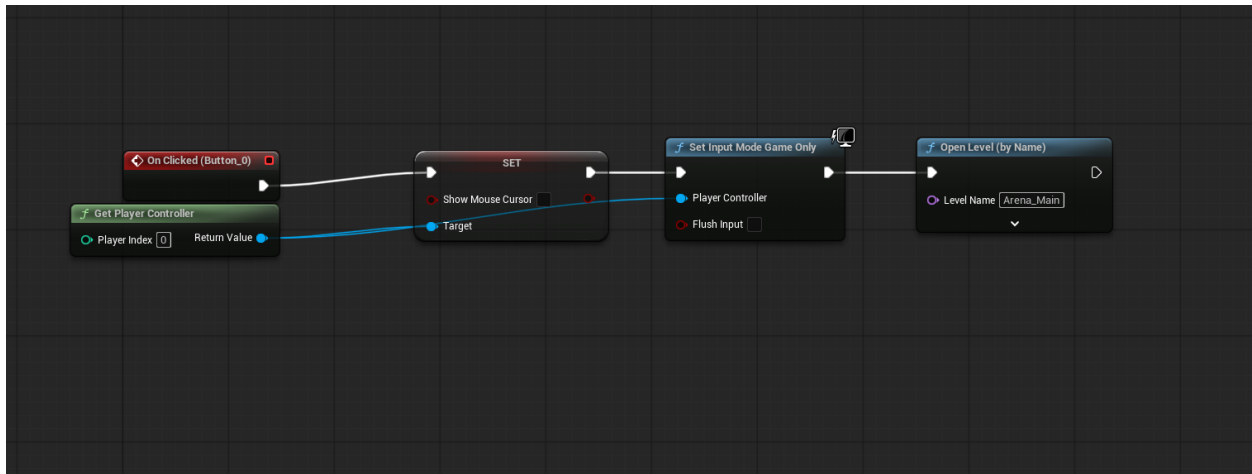

WBP_HUD — Widget designer view showing all progress bars and ammo text layout

WBP_HUD — Binding function for at least one progress bar (Graph view)

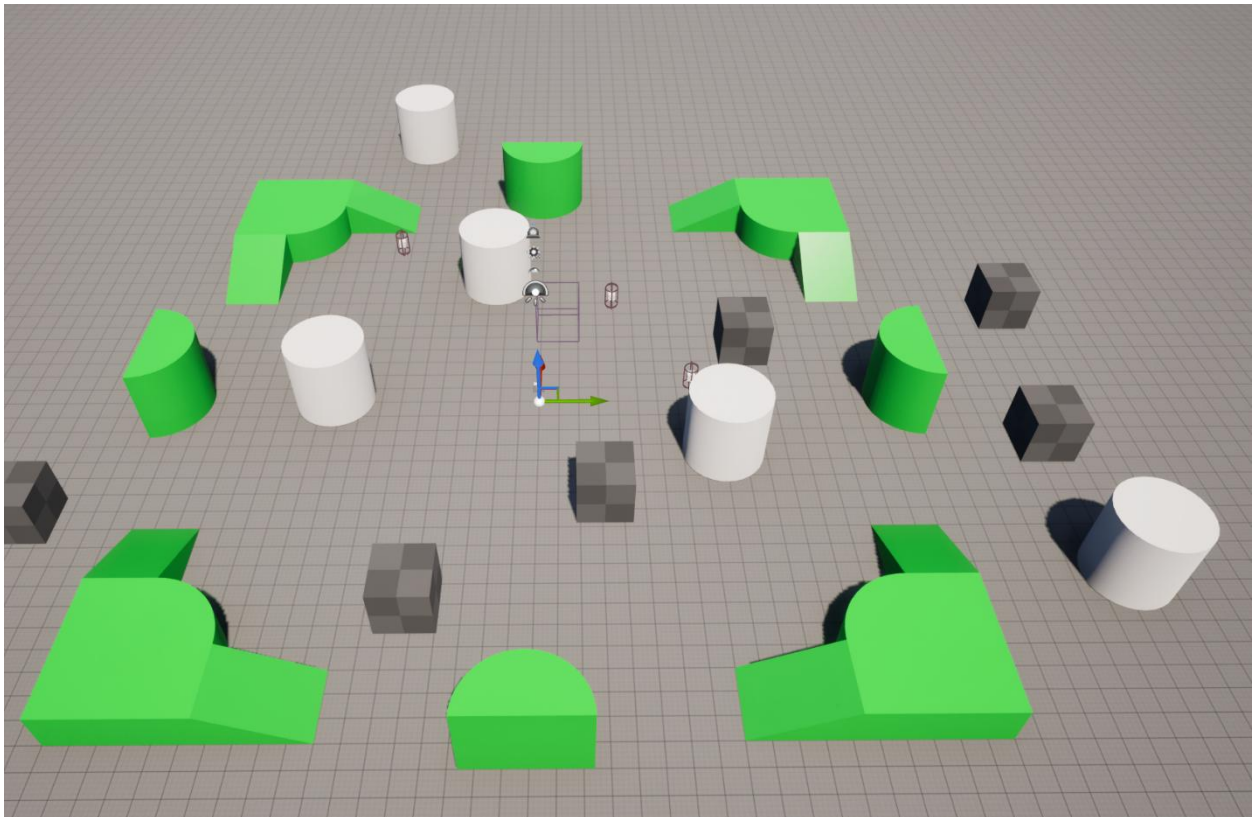

WBP_GameOver — Designer view showing outcome text and Restart button

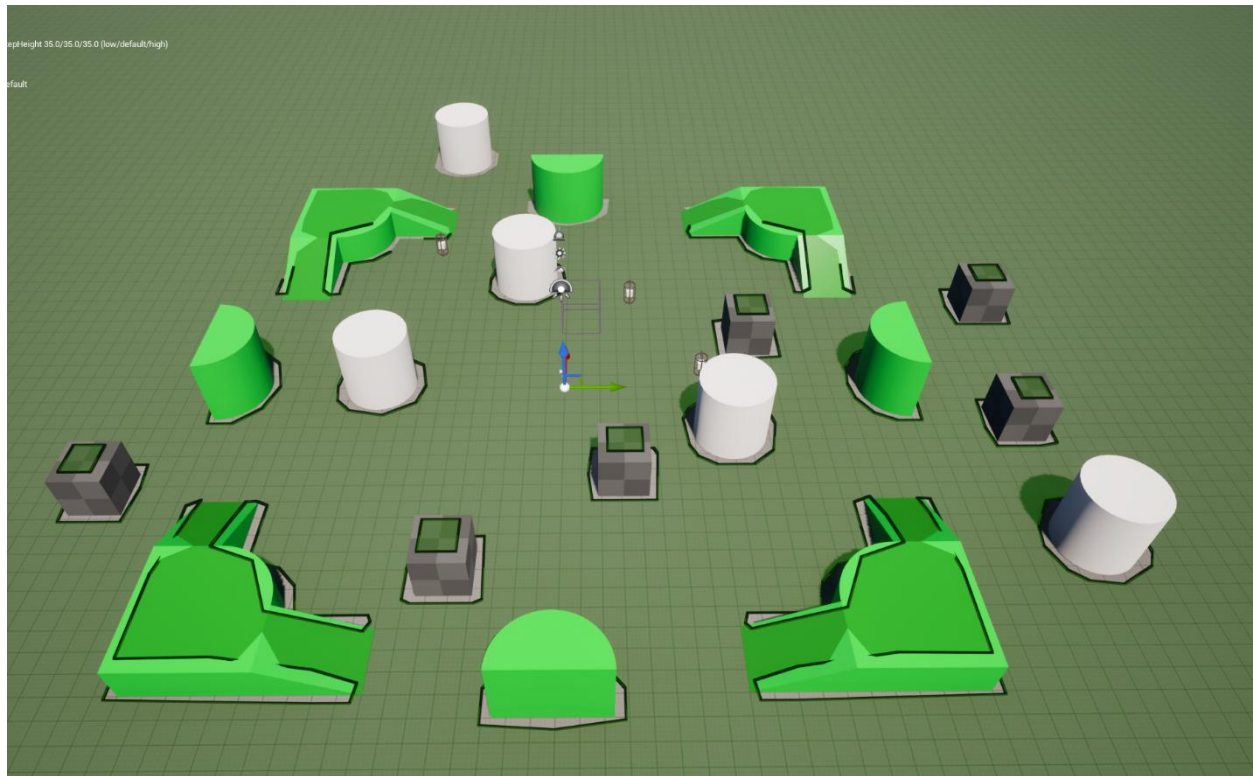

WBP_GameOver — Restart button OnClicked graph (Open Level call)

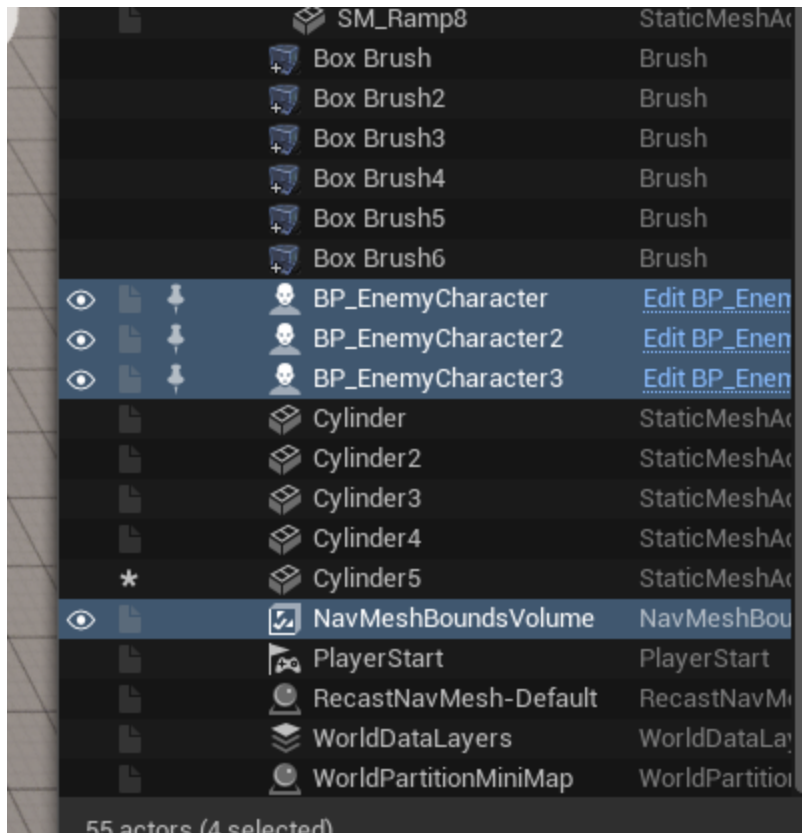

Editor Views

Level viewport — Top-down or perspective view showing the arena, obstacles, and three enemy placements

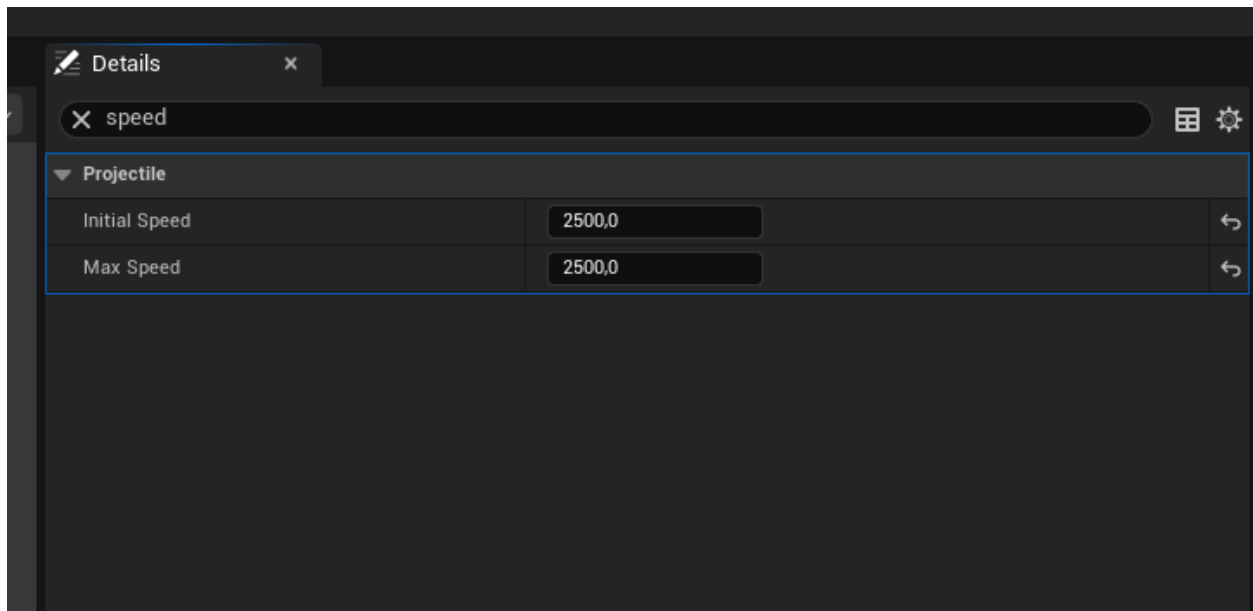

NavMesh visualization — Press P in viewport, capture the green NavMesh tiles covering the floor

World Outliner — Showing the three BP_EnemyCharacter instances and the NavMesh Bounds Volume

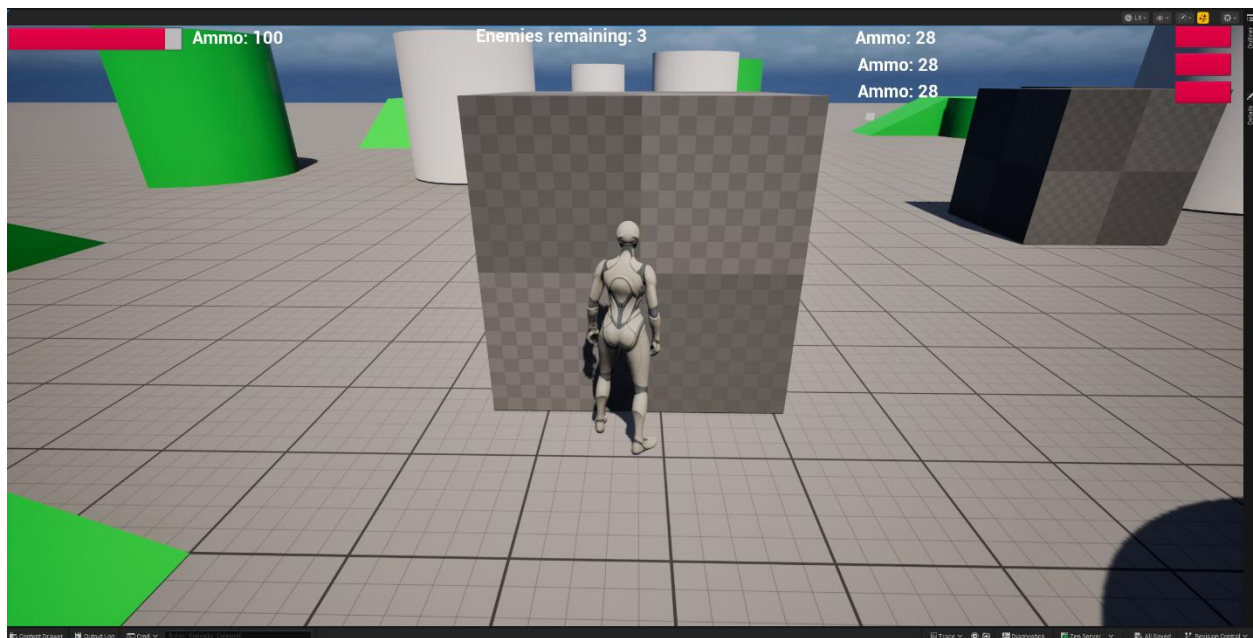

▼ Collision			
Simulation Generates Hit Events	☐		
Phys Material Override	None	None ▼	
Generate Overlap Events	☒		
Can Character Step Up On	Yes ▼		
▼ Collision Presets		BlockAllDynamic ▼	
Collision Enabled	Collision Enabled (Query and Physics) ▼		
Object Type	WorldDynamic ▼		
	Ignore	Overlap	Block
